

Mine Safety Courses

There are few places where safety is more important or more hazards exist than a busy mining operation. Our partner, Vivid Learning Systems was first to market with quality, effective online training specific to MSHA regulations and continues to be the industry leader. Vivid Learning Systems' Part 46 and Part 48 libraries have become a precious resource for leading mining companies across the nation.

Clients have seen their safety records improve when utilizing our standardized, consistent and mine-specific compliance training solution. Our MSHA library is completely scalable across your entire enterprise, can be customized to meet your specific needs, and can be deployed quickly. We give you the flexibility to train employees anywhere, anytime, with fully automated, centralized administration and compliance documentation. It's simple. When you increase productivity, improve your safety performance and get more training for the dollar...your bottom-line gets bigger.
