

Training Courses Every Organization Needs

As a WeComply Partner, Cogentys offers a growing library of interactive and informative training courses that can be customized to your organization's needs, translated into any language, assigned to selected employees, and tracked for compliance purposes.

Everyone I have worked with at WeComply has been great to deal with. Course set-up and administration are quick and simple, and the courses are well-written. We currently have our employees take three courses each and are looking to add a fourth.
